Re: RRG/Clayton Chemical Site (Soil Removal)

Dear Mr. Turner:

I represent Dover Resources, Inc., which recently received a general notice of potential liability addressed to Tubular Products Company, Inc., concerning the RRG/Clayton Chemical Site in Illinois. As a result of this notice, Dover has begun attempting to locate information about Tubular Products and the RRG/Clayton site. However, in view of its lack of information Dover is not at this time in a position to address or respond to any issues concerning potential liability at the RRG/Clayton site or the other issues outlined in the notice letter. For this reason, Dover requests an additional period of approximately 90 days—or until January 9, 2006—in which to continue its efforts to locate information regarding Tubular Products and the site, and to respond to the notice letter.

Further contacts with Dover Resources about this matter should be addressed directly to me as its counsel. You are welcome to contact me by telephone at (918) 586-8978. I would appreciate very much your confirming in writing that the above-requested extension is acceptable. Thank you for your consideration.

Sincerely,

Stephen R. Ward
